Management fee	<ul style="list-style-type: none"> Management fee is deducted from the investment reserve according to the amount of the investment reserve on the 10th date of each month or the working day following it (hereinafter: accounting date): <ul style="list-style-type: none"> - 1.25% of the investment reserve per year if on accounting date it is smaller than 6,500 euros - 1.0% of the investment reserve per year if on accounting date it is between 6,500 – 65,000 euros - 0.75% of the investment reserve per year if on accounting date it is between 65,000 – 650,000 euros - 0.5% of the investment reserve per year if on accounting date it is at least 650,000 euros Minimum monthly management fee is <ul style="list-style-type: none"> - 1.25 euros for contracts concluded before 30.04.2015 - 2 euros for contracts concluded starting from 01.05.2015
Disbursement fee	<ul style="list-style-type: none"> 12 euros 0 euros in case of insured person's death 0 euros after transfer day
Fund unit exchange fee	<ul style="list-style-type: none"> 3 euros 0 euros if the order is submitted through SEB Internet Bank <p>Service fee is charged from the sales value of the exchanged securities, before acquisition of the replacement securities.</p>
Risk fees	<ul style="list-style-type: none"> Risk fee is calculated once a month on the accounting date. The amount of risk fee for additional insurance covers is indicated in the insurance policy. Risk fee is not calculated for 2% life insurance cover. Risk fee for continuation of insurance premiums cover is calculated as a product of risk sum and insurance tariff. The risk sum is a discounted present value of premiums from accounting date until the transfer day. The insurance tariff is found based on policyholder's information. Risk assessment may result in added risk and increase the risk fee.

Monthly insurance tariffs for contracts concluded or cover for continuing insurance premiums chosen starting from 19.12.2012:

Calculation example of risk fee for continuation of insurance premiums:

Policyholder is 36 years old, contract has been concluded on 05.02.2013, risk sum or discounted present value of premiums is 5,240 euros.

$$\text{Risk fee} = 0,00026 * 5,240 = 1,36$$

Added risk: Risk rate from risk fee is 125% and from present value 0.0167% = 1.36 * 0.25 + 5,240 * 0.000167 = 1.20
